Intelligent Mail® Barcode Available from DMS.

In May 2009, the greatest automation discounts will no longer be available for mailers who use the POSTNET™ barcode. To qualify for the lowest postal rates, mailers must implement the Full-Service Intelligent Mail® barcode, already available from DMS.

The new barcode services from DMS provide the greatest postal discounts plus access to the complete range of Intelligent Mail® benefits. To prepare yourself for one of the most significant postal changes in years, contact DMS – we are prepared.

Implementing Intelligent Mail® Barcode

As the first mandated barcode change since the Postal Service invented POSTNET™ back in 1980, some companies may find themselves in uncharted territory. In addition to new data and processing requirements, the graphics, fonts, coding and print specifications for the Intelligent Mail® barcode are different from any existing barcode used today. DMS can create the new barcode and handle your production and distribution from start to finish so smoothly you won't even know a change has been made.
