DMS Supports All USPS Barcode Requirements for Maximum Postal Discounts

The USPS has updated their plans for the rollout of the Intelligent Mail[®] barcode. Choosing Full Service Intelligent Mail[®] services from DMS will make it easier obtain the lowest postal rates, track-and-trace capabilities, address change services, cleaner-looking mailpieces, improved scanning, and the ability to participate in the new USPS Seamless Acceptance program.

- In 2009, mailers will have three barcode options: Full-Service Intelligent Mail[®] barcode, Basic Intelligent Mail[®] barcode, and the current POSTNET[™] barcode. When the May 2009 price changes are announced, it will include two prices: one for Basic Intelligent Mail[®] barcode and POSTNET[™] barcode, and a lower price for Full-Service Intelligent Mail[®] barcode. DMS provides all required software and services to meet customer needs.
- In May 2010, the POSTNET[™] barcode will no longer be an option. DMS is prepared for this change and will help you make the transition smoothly without incident.
- In addition to lower postal rates, benefits for the Full-Service Intelligent Mail[®] barcode include: free start-the-clock information to notify mailers when the USPS takes possession of mailings and free address correction updates for mailpieces that do not have the most current address or are undeliverable for other reasons.
